Feed roll with shark-tooth bars for positive feeding

Motor with integral gear drive (no chains)

Access doors with large opening for quick, easy hammer and screen grate changes

Gas shocks to regulate pressure of feed roll on material

Jeffrey Specialty Equipment Corporation

JEFFREY EASY-ACCESS HORIZONTAL WOOD HOGS

Specially designed for:

Panel Board Edge Trim and Scrap
Furniture Scrap
Woodworking Scrap
Lumber Mill Waste

Hogs are supplied as an integrated system – on a structural base with a drive system, conveyor, powered overhead feed roll, and controls. The feed conveyor can be vibrating, belt, or chain, depending on the material being handled.

Very efficient – constant rate of feed to avoid surges. This allows the use of minimum horsepower and produces a very consistent product size.

The downward pressure exerted by the feed roll is infinitely adjustable through the use of gas-filled support shocks.
